

# FOREST HOUSE DENTAL PRACTICE

## Want to know more about Dental Implants?

Dr Adam Patel is our visiting Implant referral surgeon here at Forest House whilst also providing mentorship and lecturing for Implant Dentists. He regularly contributes clinical articles to journals and magazines, authors a health column within the Leicester Mercury newspaper and sits on the editorial board for a dental publication. He also holds multiple awards including The Best Young Dentist 2015 and 2016.

Having graduated from University of Liverpool, he embarked on a multitude of post-graduate courses in restorative, prosthodontics and oral surgery before returning home to Leicester to establish his career. He is one of a select few clinicians nationwide to hold a prestigious Master's degree in Implantology awarded by The University of Manchester; with it becoming one of the youngest Dental Implant Surgeons in the country. He has also completed Diploma's from various other institutes including The Royal College of Surgeons of Edinburgh and The Royal College of Physicians and Surgeons Glasgow.

Dr Adam Patel prides himself on providing all round quality patient care. If you have been considering dental implants Dr Adam Patel will help you to relax from the very first moment you walk into his surgery, and with his calm and gentle manner make your patient journey as smooth and comfortable as possible. After listening to your treatment wishes he will tailor the most suitable plan based on your treatment needs and simplify the whole process for you.

**Subject to status. 0% finance options available over 6 or 10 months**

# REPLACING YOUR LOOSE DENTURES WITH LIFE LIKE FIXED TEETH

Full mouth teeth replacement with fixed bridge on implants

Case completed by Dr. Adam Patel

Lisa visited Dr Adam Patel after losing all her upper teeth to gum disease in her early fifties. She initially had a set of loose fitting dentures to replace her teeth but she couldn't eat or chew with them. She found herself losing confidence and stopped smiling and laughing in case her teeth fell out. She had enough of the dentures and wanted a set of 'normal' teeth so she sought out to have a fixed set of teeth on implants.

At the consultation Lisa advised what her budget was and that her wish was to have a fixed set of teeth that felt and functioned just like normal teeth. Dr Adam Patel was able to propose a treatment option that was within her budget and that would give her a fixed set of teeth to eat, chew and laugh with again.

The treatment involved painlessly placing four computer guided implants into her upper jaw, which would anchor a new set of highly aesthetic teeth that would be permanently fitted into the mouth. All of the treatment was carried out under local anaesthetic.

The surgery was completed in less than three hours and after several short visits to the clinic Lisa's new set of teeth was ready to be fitted.

With a focus on gold-standard patient care and an evidence based treatment approach, at Forest House we take pride in bringing cutting edge technology and one of the best implant surgeons in the country to your doorstep.

**WINNER**

# DENTURES....BUT WITH A DIFFERENCE

Full mouth teeth replacement with stable and retentive dentures on implants.

Case completed by Dr. Adam Patel

After almost fifteen years of struggling with ill-fitting dentures this lady sought out our Implant Surgeon Dr Adam Patel's expertise to help give her smile back and transform her life.

Betty had struggled with loose dentures that gave her persistent mouth ulcers, total loss of confidence, inability to eat anything other than soft foods and a very restricted social life.

"I hadn't been to a restaurant or a social function for years. Every time I left the house I would be nervous and anxious to talk, smile and laugh with others. I would always be worried about my teeth falling out and I eventually stopped going out altogether. I just wanted my smile back and to be able to enjoy my food again."

After visiting numerous dental practices and being advised that nothing could be done to help her, Betty almost gave up on her dream of being able to enjoy a piece of steak at her favorite restaurant which she hadn't visited for years.

I did my research and found Dr Adam Patel online. I saw lots of pictures and reviews from patients that he had treated who were in a similar state to myself. There were several newspaper articles and websites displaying some amazing smiles he had created and this gave me the confidence to call and book a consultation"

At the consultation Betty advised what her budget was and that her wish was to have a set of teeth that would stay in firmly without worrying about them falling out. Our award-winning surgeon advised her that he was able to propose a treatment option that was within her budget and that he could confidently go one step further and help her achieve her dream of biting into a steak again.

Above treatments are available from as little as £95 per week! To see how we can transform your life and confidence why not book a Dental Implant Consultation with our referral surgeon Dr Adam Patel or just come in for a chat with a member of our friendly, caring and highly experienced team?
